## **Shoeboxed.com releases new budgeting statistics and Receipt Mail-In tracking**

DURHAM, N.C. — Shoeboxed.com, the leading online service for organizing receipts, has released two new receipt tracking tools this week, adding to its long list of robust features. Shoeboxed now automatically generates graphs and statistics about every user's spending habits and tracks the envelopes that users send in through the Shoeboxed Receipt Mail-In program.

### **My Statistics page ([www.shoeboxed.com/my-stats.htm](http://www.shoeboxed.com/my-stats.htm))**

Shoeboxed organizes receipts based on the data that is contained in them; Now, Shoeboxed is hoping to put that data to work for each user. Shoeboxed now takes receipt data and automatically generates four (4) graphs about each user's spending habits. This feature is available as part of the free online account available to anyone. The automatically generated graphs are:

- Total spending over time (by week or month)
- Online vs. offline spending
- Spending by shoebox (spending by category)
- Spending by shoebox over time (by week or month)

### **Mail-In Dashboard ([www.shoeboxed.com/mail-in-dashboard.htm](http://www.shoeboxed.com/mail-in-dashboard.htm))**

The new Mail-In Dashboard tracks each envelope used in the Receipt Mail-In process. Paying users mail receipts to Shoeboxed where they are scanned and uploaded to users' accounts and then mailed back to them.

Users can now log into their accounts and track the following things about their envelopes:

- Date mailed to user by Shoeboxed
- Date received by Shoeboxed
- Date uploaded by Shoeboxed to user's account

Receipt Mail-In members also get automatic emails alerting them when any of these events occur.
