## **Shoeboxed Unveils Brand New 6.0 Version of Popular Receipt and Mileage Tracking App for iPhone and iPad**

*New release introduces redesigned interface, iPhone 6s 3D touch features and advanced expense reporting capabilities*

DURHAM, NC - Leading receipt and expense management company Shoeboxed announces today the new 6.0.0 version of the Shoeboxed Receipt and Mileage Tracking App for iPhone and iPad. The overhauled app is available as a free download in the Apple iTunes Store and includes an entire new suite of features and updates, allowing users to submit receipts, track expenses and create expense reports from their mobile device faster and more effortlessly than ever before.

New and noteworthy features include a sleek bottom tab navigation bar replacing the old dashboard, a brand new category tagging system, an optimized expense reporting flow, and new iPhone 6s 3D Touch features like Quick Actions and Peek and Pop. Redesigned for iOS 9, the brand new app is largely influenced by in-depth interviews with Shoeboxed users and focuses on the on-the-go needs of busy small businesses and entrepreneurs.

“We wanted to focus on making the Shoeboxed mobile experience as streamlined and efficient as possible,” said Shoeboxed CEO Taylor Mingos. “Our goal is to be the ultimate mobile solution for receipt and expense management, and everything about the new app was created with the busy, on-the-go user in mind.”

## Features and Updates:

### → Advanced Receipt Filters

Users can now categorize receipts at the point of submission. The category filter sidebar is also now replaced with sliding tag categories that drop into the screen without interrupting the receipt view. In addition, users can select multiple categories at once while continuing to view filtered receipts on the same screen. It's now faster than ever to locate expenses and categorize receipts.

### → Expense Report Overhaul

Email receipt tables are now optimized for Apple mail and Gmail mobile. The expense reporting process has also been simplified - users simply click "Expense Report" in the upper right corner of the receipt list screen and select which receipts they'd like to send to the report - getting reimbursed for business expenses have never been easier.

### → Simplified, Redesigned Interface

The old dashboard has been completely replaced with a new and intuitive bottom navigation bar. The new navigation bar allows for a more efficient and predictable experience by allowing users to perform all major actions from within any screen of the app. Receipts are also now organized by date of purchase instead of date of upload, and we have made it easier to edit and manually add data to receipts.

### → 6s 3D Touch Shortcuts

With the addition of Quick Actions, users can start a mileage tracking trip, scan a receipt, and create an expense report directly from their home screen with a single press of the app icon. The new app will also be introducing Peek and Pop for images of receipts. Users can edit receipt details and instantly get reimbursed for an expense in seconds by hard pressing a document inside the app.

## **ABOUT SHOEBOXED**

Since 2007, Shoeboxed has been the preferred small business expense tracking solution for over one million users worldwide. The pioneers of cloud based receipt scanning, Shoeboxed saves people time, money and hassle by turning receipts into an organized, categorized, IRS accepted archive of secure data. Shoeboxed offers a fully functional free plan, as well as premium plans that include a prepaid mail-in service for physical receipts. Shoeboxed is based in Durham, North Carolina, and has a sister office in Sydney, Australia.
